International application No.
PCT/US04/10882

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-16</u>	YES
	Claims <u>NONE</u>	NO
Inventive step (IS)	Claims <u>1-16</u>	YES
	Claims <u>NONE</u>	NO
Industrial applicability (IA)	Claims <u>1-16</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-16 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest an electrode or method for making an electrode wherein an electrode housing contains a bed of carbonized charcoal powder which is compressed with a moveable piston in contact with the charcoal, which piston compresses the charcoal powder to reduce the resistivity of the powder to less than about 1 ohm-cm. At least one electrical contact is in contact with the compacted powder to conduct electrical current flow into and out of the charcoal powder and a porous wall in contact with the charcoal powder allows liquid or gaseous electrolyte to flow to and from the compressed powder.

Claims 1-16 meet the criteria set out in PCT Article 33(4), and thus meet the industrial applicability because the subject matter claimed can be made or used in industry.
